

QuikRuler III™

*The Affordable Measuring Module
for Architects, Construction Estimators,
Engineers & Surveyors*

QuikRuler III is an exciting tool that quickly and accurately automates blueprint takeoff and drawing measurement processes. QuikRuler III is perfect for construction estimators, architects, engineers, surveyors, and other professionals who require fast, accurate measurements from drawings.

QuikRuler III can be used with either a GTCO CalComp Roll-Up III™ or Super L IV™ digitizer and it comes with everything you need to get started—measuring menu, LCD display with a sophisticated, yet easy-to-use built-in measuring program and integrated USB connector for easy plug-n-play use.

QuikRuler III is proven to deliver faster, more accurate takeoffs and measurements, boosting performance up to 3 times! More bids means more jobs...greater accuracy means larger profits!

QuikRuler III includes all functions necessary to measure lengths, as well as irregular areas in any scale or unit of measurement. For example, to measure an area, simply select AREA from the menu then trace or touch points along the perimeter of the area with the pointing device. The resulting measurement will appear (in English or metric units) on the LCD display. QuikRuler III also performs standard calculator functions and can count items on blueprints or drawings with ease.

Both the Roll-Up III and SuperL IV digitizers that are available with QuikRuler III are compatible with most estimating software, so your investment is protected when you upgrade to the higher performance of a computerized estimating system.

FEATURES

Versatile

- Works with Roll-Up III or Super L IV Series Digitizers with integrated QuikRuler III support
- No computer required!

Easy to Use

- No computer experience required
- Integrated USB to send data to your PC, no drivers required
- Works alone or with a PC
- Input numerical data into any spreadsheet application, including Lotus 1-2-3® and Microsoft Excel®
- Single cable connects the QuikRuler III to the Super L IV or Roll-Up III making set up very easy

Standard Functions

- Measuring functions include area, length segment, length continuous, count, perimeter, units, scale, auto scale, count scale
- Calculator functions include add, subtract, divide, multiply
- Units of measure include inches, feet, yards, miles, millimeters, centimeters, meters, kilometers, no units
- Works at any scale

Durable and Dependable

- Easy to read screen
- Made of durable, tough materials
- Backed by a two-year limited U.S. warranty and free technical support

GTCO CalComp
PERIPHERALS

QuikRuler III™

MEASURING MODULE

Platform Support	PC: Win 98, 98SE, ME, 2000, XP; MAC: OS9, OSX
Hardware Interface	Integrated USB, QuikRuler III Legacy available for RS-232
Power Requirements	9 Volts at 500 mA/Powered by a Roll-Up III or Super L IV digitizer
Operating Temperature	50 to 104°F/10 to 40°C
Storage Temperature	-22 to +158°F/-30 to +70°C
Weight	175 g/6 oz
Size (L x W x H)	5.6 x 2.6 x 2 in/142 x 66 x 51 mm
Humidity Range	0 to 90%, noncondensing
Warranty	Two-year limited U.S. warranty, free technical support

Included With Your Purchase

- LCD display featuring 16 characters x 2 lines
- Tablet interface cable for Roll-Up III and Super L IV
- Measuring menu
- User's manual

Other Options

- Choice of language for display and menu: English, French, German
- Legacy RS-232 interface option for Roll-Up I, II and Super L I, II, III

EASY CONNECTIVITY

To a Super L IV Digitizer
