

WINESTIMATOR®

THE LEADING PROVIDER OF COST ESTIMATING SOLUTIONS

WinEst eTeam® Collaborative Estimating

WinEst eTeam is the professional estimator's solution for efficient project cost estimating teamwork. It is designed for larger companies where collaborative estimating is important. With WinEst eTeam, estimates can be produced and shared from anywhere, across the hall or across the globe. Estimators of all disciplines can collaborate on the same estimate at the same time, across networks or the Internet.

Collaborative Communication

- Enables multiple estimator teamwork, sharing and input, on the same estimate, at the same time.
- File security & access controls help safely accommodate and control multiple estimators.

What If Analysis

- Apply estimate items to base or unlimited alternates.
- Control the status alternates within the estimate: pending, approved, denied.

Internet Connectivity

- Easily e-mail estimates between project team members.
- Share cost knowledge databases & estimate information via the web
- Broadcast RFI's to selected vendors, suppliers or subs based on a variety of criteria.

Interfaces

- Built-in flexible export design tool allows multiple application interfaces

“eTeam is advantageous because it allows us to react very quickly and make assumptions. That helps with credibility.”

- Gregory Williamson
Walsh Bros. Inc.

On-Screen Paperless Takeoff

- The WinEst Virtual Takeoff option is integrated with WinEst eTeam and enables cost efficient paperless takeoff directly from the PC screen, in many standard digital image file formats.

WinEst® Integrators

- WinEst Integrator options are available for inter application exchange of cost data between WinEst eTeam and Microsoft Project, Microsoft Visio, Microsoft Business Solutions - Solomon, Microsoft Great Plains, Intuit Master Builder, and Intuit QuickBooks and many more.

On-Line Procurement

- The WinEst RFQ Server option is compatible with WinEst eTeam and enables one to rapidly generate and deliver RFQ's and ITB's to subs and suppliers via online portals

Multiple Document Interface

- Open multiple estimates at a time and easily drag and drop items between multiple estimates

WinEst Enterprise Data Manager

- The WinEst Enterprise Data Manager gives companies SQL based revision control and management abilities.

Additional WinEst Options for Efficient Project Cost Estimating

Reports and Forms

- Customizable reports
- Business forms tools allow flexible creation of customized HTML and RTF-based business forms and documents

Chained Printing

- Multi-report
- Concurrent printing

Totals Page Filter

- Filter based totals page for individualized report formatting

Multi-Currency

- Multi currency capabilities for international and multi-national organizations
- Support metrics for an unlimited number of alternate currencies, and international currency prices

Estimate Manipulation

- Materials factor allows variable adjustments to prices by locality
- Customizable filters greatly enhance analysis and reporting tasks
