

# WINESTIMATOR®

THE LEADING PROVIDER OF COST ESTIMATING SOLUTIONS

## WinEst® Estimating Software and Accessories

WinEst estimating software and its accessory modules are designed to assist the professional cost estimator to perform rapid, and complete cost estimates. In more than 10 years of bringing the industry the most advanced estimating software solutions and peripheral modules, WinEstimator has created a family of software solutions trusted everyday by estimators around the world in more than 50 countries.

### Estimating

**WinEst Pro®** is designed for professional cost estimators in a stand-alone environment.

- It comes with a starter construction database and will work with any WinEstimator, Inc. database and most third-party cost databases formatted by WinEstimator.
- WinEst Pro Integrates with industry leading Accounting, Scheduling/Project Management, and CAD software solutions.

**WinEst Pro Plus®** is designed for professional cost estimators in a multi use environment or as a high-powered stand-alone system.

- It comes with a starter construction database and will work with any of the WinEstimator, Inc. databases and with all add-on cost databases formatted by WinEstimator.
- WinEst Pro Plus' enhanced features include, What-If analysis with a state-of-the-art Alternates feature, Multi-Currency capabilities, and more.
- WinEst Pro Plus Integrates with industry leading Accounting, Scheduling/Project Management, and CAD software solutions.

**WinEst eTeam®** is designed for larger companies where collaborative estimating is important.

- With WinEst eTeam, estimates can be produced and shared from anywhere, across the hall or across the globe. Estimators of all disciplines can collaborate on the same estimate at the same time using different databases, across networks, or the Internet.

### Enterprise Data Manager

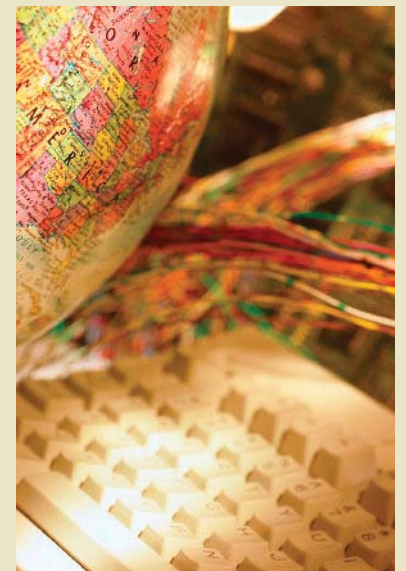

**Enterprise Data Manager™** enables companies, large or small, to securely and efficiently organize and manage information related to the creation of cost estimates in an easy to understand and use hierarchical data structure. All information maintained by WinEst Data Manager is stored in either Microsoft SQL or MSDE.

### Takeoff

**WinEst Virtual Takeoff®** gives the estimator unparalleled speed and accuracy by enabling them to conduct takeoff directly from the PC screen using digital image plans from file formats such as DWG, PDF, JPEG, BMP and many others.

Unlike other third-party add-ons, WinEst Virtual Takeoff is dynamically linked to your estimate data.

**Takeoff Pro for Windows®** is used in conjunction with WinEst and a compatible digitizer board. It gives the estimator unparalleled speed and accuracy in digitizer board takeoff.

THE LEADING PROVIDER OF COST ESTIMATING SOLUTIONS

## Terminal Server

### WinEst® Terminal Server

- WinEst is available via Terminal Services. Users can connect to the Internet and use WinEst hosted on a WinEstimator server.
- Running WinEst in a Terminal Server environment will ensure that the entire estimating department is accessing the same version of the program.

## Integration

### Primavera® P3 & P3e/c Integrator

- The Primavera P3 & P3e/c integrator is designed to allow estimators to import project plans from Primavera into WinEst.
- The software also provides a dynamic link between estimating and scheduling which automatically populates the cost account and resource dictionaries.

### Microsoft Project® Integrator

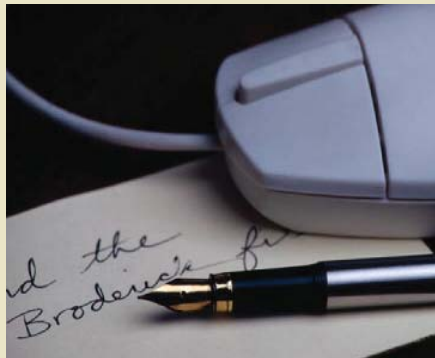

- Generate Microsoft Project schedules based on integrated WinEst estimate file content.
- Estimators can create WinEst-driven projects, tasks, resources, rate tables, and resource assignments. Also, estimators can group WinEst information by job cost code, WBS1 and import tasks for assignments from existing Microsoft Project files.

### Microsoft Visio® Integrator

- This flexible integration interface enables WinEst users full access to any Visio object and object property in a Visio file.
- Visio drawing data is exported to automatically generate a WinEst estimate.

### Microsoft Great Plains®

- WinEst integrates with Microsoft Great Plains via WennSoft Project Management software.
- WinEst contains an advanced XML interface with WennSoft and Great Plains accounting Software.

## Conceptual Estimating

### WinEst Smart Model™ Estimating

- Allows A/E/C industry professionals to quickly and easily create conceptual cost estimates for dozens of building types.
- The module contains an infinite variety of on-the-fly specification variable selections and gives the ability to create professional custom reports and presentation materials.
- Based on the R.S. Means Square Foot Cost Data Book, it adds a level of detail and accessibility not available in the RS Means publication.

## RFQ Server

### WinEst RFQ Server®

- Uses existing cost estimate data to quickly create RFQs and ITBs and enables on-line users to deliver the RFQs and ITBs to subs and suppliers, via email, fax, or the Web.

## WinEst Databases

- Conceptual/Modeling
- Residential/Light Construction Line Items
- Residential/Light Construction Line Items with Assemblies
- Commercial Open Shop Line Items
- Commercial Prevailing Wage Line Items
- Commercial Open Shop Line Items with Assemblies
- Commercial Prevailing Wage Line Items with Assemblies
- Heavy Construction Prevailing Wage with Assemblies
- Mechanical Line Items with Assemblies
  - Electrical Database
  - Environmental Line Items

## 3<sup>rd</sup> Party Databases

- RS Means (Multiple databases available. Call for details)
- ECHOS Environmental
- MCAA
- NECA
